

IDEARISO®

WHO WE ARE

Rice has always been a staple food for humans, combining unique nutritional properties with a vast combination of usage in the kitchen. Final results could be surprisingly different all over the world.

Ideariso Società agricola is a company dedicated to rice cultivation, based in Vercelli, in the middle of rice farming area of Piedmont, in Italy. Founded in 2015, Ideariso it is currently run by Massimo and Maurizio Tabacchi. Agronomists and rice farmers, they have been working with passion and diligence since 1995 to create unique, high-quality products.

Ideariso's rice fields are located in Vercelli and in Briona (Novara province). The production plant, where the rice is stored and packaged, is located in the municipality of Vercelli. Ideariso aims to obtain the best possible final product for its customers and to make quality and sustainability its distinguishing features, thanks to the great attention given to cultivation and to unique and innovative packaging and graphics.

WHAT WE PRODUCE

OUR MILLED RICE

Sustainably farmed in the Ideariso paddy fields and delicately processed, our milled rice consists in the classic varieties used for risotto preparation as well as many other recipes.

- **Carnaroli Rice**
- **Gigante Vercelli Rice - Slow Food Presidia**
- **Sant'Andrea Rice**

OUR WHOLE GRAINS RICE

Sustainably farmed in Ideariso paddy fields, our whole grain rice maintains a thin outer layer on the grain which guarantees excellent nutritional values and delivers very pleasant aromas and flavors.

- **Penelope Wholegrain Black Rice**
- **Gilda Wholegrain Red Rice**
- **Felix Wholegrain Rice with Giant Rice Germ**

OUR DRIED PREPARATIONS FOR RISOTTO WITH GIGANTE VERCELLI RICE - SLOW FOOD PRESIDIA

High quality dehydrated ingredients combined with our Gigante Vercelli Rice – Slow Food Presidia for tasty and quick 'home made' risotto dishes

- **Dried preparation for risotto with Truffle**
- **Dried preparation for risotto with Saffron**
- **Dried preparation for risotto with Porcini Mushroom**
- **Dried preparation for risotto with Red Radicchio**
- **Dried preparation for risotto with Squid Ink**
- **Dried preparation for risotto 'Panissa Vercellese'**
- **Dried preparation for risotto with Pumpkin and Amaretti**
- **Dried preparation for risotto with Pecorino cheese and Black Pepper**
- **Dried preparation for risotto with Tomato and Rosemary**

HOW WE PRODUCE

CULTIVATION

For more than 50 years we have been passionately sowing, tending and harvesting our rice in the provinces of Vercelli and Novara. Our experience, agronomic knowledge and continuous experimentation and research for new techniques and varieties allow us to achieve great results in rice farming.

We believe in a sustainable rice-growing system: we strive to keep usage of chemical fertilizers and pesticides to a minimum, preferring green manure practices and following Agro-environmental Programs of European Rural development guidelines.

Our farming system helps minimize environmental impact and maximize field, plant and grain quality potential. We carry out periodic analyses of our rice and paddy rice, to ensure the absence of any chemical residues on the final product sold to our customers.

PROCESSING

Harvested rice (commonly known as 'paddy rice') needs to be processed by removing its external layers.

Milling degree can be decided in order to obtain different products, beginning with wholegrain rice (or brown rice) where only the rice husk are removed, passing through milled rice (or white rice) where external layers of the brown rice are taken away, trying to preserve the rice gem as much as possible.

Our rice is processed with the help of a local expert, whose touch guarantees the high quality of our products through a delicate and light treatment: it preserves a thin portion of the grain's external layer, which guarantees cooking resistance and the exceptional creaminess of our risottos.

HOW WE PACK

A special feature of our product, together with the quality of our rice, is the choice of packaging.

RECYCLED CARDBOARD AND TIN PLATE TUBES

Our packaging combines functionality and storage length while paying attention to environmental sustainability. Our aesthetically pleasing, recycled cardboard and tin plate tubes come in three formats (1000g, 500g, 320g). Inside the tubes, our rice is packaged in modified atmosphere packaging, a solution which allows for greater shelf life while maintaining freshness. A plastic cap and an easy-peel lid guarantee easy opening and storage. Our tubes are great for upcycling projects for containers, pencil holders, organizers. In 2020 we decided to extend our 320g tube packaging to our risotto mixes: elegance, sustainability and flavor for all!

VACUUM PACK

The simplest and safest packaging for professional dining and for cooking for large groups. There is simply nothing better than rice dishes, and risottos especially, to engage communities and keep alive the pleasure of tasting products of the Italian culinary tradition.

Our Carnaroli rice is ideal for preparing outstanding risottos according to the Italian tradition. It is suitable for steaming and boiling as well, as it is highly appreciated for its firmness.

CARNAROLI RICE: HIGHEST QUALITY AND PERFECT COOKING

Carnaroli rice is the go-to ingredient for risottos, as it combines flavour with excellent heat resistance.

Quality begins with the rice field: the highly optimizing techniques we use are a product of great agronomic experience and of a high degree of care of every single paddy field. These allow for highly efficient growth and maturation of the plants throughout the growing season.

We then proceed to a detailed selection of the rice in order to achieve high levels of homogeneity of the final product. The milling process is specifically adapted to this premium variety, as it preserves a thin external layer of the germ and more than 50% of rice embryos, thus obtaining the perfect risotto in every occasion.

Ancient
variety of
Vercelli

GIGANTE VERCELLI

ANCIENT RICE

Gigante Vercelli (literally Vercelli Giant) is a large grain rice of unique quality, perfect for extraordinary risotto dishes. It is particularly appreciated for its exceptional creaming.

The Presidia sustain quality production at risk of extinction, protect unique regions and ecosystems, recover traditional processing methods, safeguard native breeds and local plant varieties.
www.fondazione Slow Food.it

GIGANTE VERCELLI: ANCIENT VARIETY WITH LOW PRODUCTION AND HIGH QUALITY

Gigante Vercelli rice is an ancient variety recovered in purity and brought back to cultivation. Ideariso, as disposed by the Italian Ministry of Agriculture, is responsible for its conservation as a historical variety.

Its small production, organoleptic properties and natural resistance to diseases (a unique trait) are what have historically made this variety of rice an excellent and healthy product. To this day, these elements are what make Gigante Vercelli unique in risotto dishes: the large grains stay separated even at the end of the cooking process while giving the risotto a fine creaming.

Ideariso grows Gigante Vercelli rice in the most suitable paddy fields for this variety, in the province of Vercelli, without the use of fungicides. Milling is carried out in a small high-quality plant, where low volumes of grains are processed per day, in order to obtain perfect milled rice.

In 2018, Ideariso's commitment and tenacity in rediscovering this ancient variety led to the recognition of the Slow Food Presidia.

SANT'ANDREA

TRADITIONAL RICE

Versatile
in the
kitchen

Sant'Andrea Rice is part of the Vercelli tradition and its history is linked to its unique adaptability to the most difficult farming soils. In making risotto, the rice grains enhance the flavors of the different ingredients. It is excellent for dishes such as arancini and casseroles.

SANT'ANDREA: TRADITION AND VERSATILITY IN THE FIELD AND IN THE KITCHEN

Sant'Andrea Rice is perfect for a wide set of recipes as it blends perfectly with various ingredients and cooking techniques.

In the fields, the rustic and tenacious Sant'Andrea rice is able to resist harsh weather and unfavorable soil conditions, such as those of the Baraggia rice fields in the province of Vercelli.

The Italian tradition loves this rice for risotto dishes, as it absorbs seasonings in an exceptional way, but also for salads and desserts.

Its name comes from the Vercelli Cathedral, an iconic symbol of the European capital of rice.

Gilda is a wholegrain red rice combining flavour to a delicate fragrance. It is rich in fiber, phosphorous and magnesium. It is especially suitable for vegan diets as well as for all rice recipes, from the most simple to the most innovative or sophisticated.

INTENSE FLAVOR AND DELICATE FRAGRANCE, FOR SIMPLE OR REFINED DINING

Gilda is a wholegrain rice which combines great nutritional properties with an intense flavor, a delicate fragrance and a natural deep red color. Ideariso obtains this rice through a careful selection and production process.

Nutritional claims: high fiber content, source of phosphorus and magnesium.

Gilda red rice is an exclusively Italian variety, cultivated by Ideariso in the Vercelli and Novara provinces. Ideariso's selection process follows the highest qualitative parameters: as always, quality begins in the fields with our agronomists and is followed by rigorous and rice-specific selection, storage and processing stages.

The dry paddy rice is stored for a few months before the processing stage, a step which determines the unique characteristics of this red wholegrain rice.
